About Us

Welcome to **Livwell Middle East**, where innovation meets sustainability.

As a leading provider in the Middle East, we specialize in a comprehensive range of air and water treatment products, along with advanced sensors and monitors.

At Livwell Middle East, we believe in the power of technology to create healthier and more sustainable environments. Our dedicated team works tirelessly to ensure that every product meets the highest standards of quality and reliability.

We partner with renowned brands to bring you the best in air and water treatment solutions, tailored to meet the unique needs of our customers. Join us on our journey towards a cleaner, healthier future with Livwell Middle East.

Your trusted partner in air and water treatment.

Mission & Values

MISSION

Ensuring the purity and safety of every single moments of life.

VISION

Delivering exceptional solutions that exceed customer expectations and elevate the quality of life.

CORE VALUES

- | Faith
- | Conscience
- | Grateful Heart

PRODUCT RANGE

AIR

- Air Purifiers
- Humidifiers & Dehumidifiers
- Air Filtration Equipment
- Air Handling Units
- Commercial Kitchen Hoods
- Ventilation Fans

WATER

- Whole House Filtration
- Water Softeners
- Reverse Osmosis Systems
- Commercial Water Filtration
- Water Dispensers
- Drinking Faucets
- UV Water Treatment
- Shower Filters
- Semi-auto Water Filling Station

MONITORS & SENSORS

- IoT Based Water Quality Monitoring
- Room Pressure Display
- CO Monitoring System For Car Parking
- Real-time Temp., Humidity & IAQ Monitoring
- Data Loggers

AIR TREATMENT PRODUCTS

AIR PURIFIERS

Our air purifiers offer the perfect blend of elegance and efficiency, designed to significantly enhance the air quality in your home or office. Our advanced purifiers feature a sophisticated multi-step filtration and sterilization system that guarantees optimal performance, capturing and eliminating airborne pollutants with unparalleled precision.

SERENITY

PURE LIVING CLEAR FUTURE

- | Wall Mounted
- | Ceiling Mounted
- | Floor Standing

HUMIDIFIERS & DEHUMIDIFIERS

We offer dehumidifier is a machine that reduces the humidity to the desired level by removing water from the air and vice - versa for humidifiers. It is commonly used for human comfort in homes, offices, warehouses, and swimming pool areas.

AIR FILTRATION EQUIPMENT

Air filters and Equipment to remove contaminants and pollutants to maintain indoor air quality as per the Local / International Standards. Equipment such as Kitchen Ecology Units & Electrostatic Precipitators (ESP), UV-C / PCO / BPI Products, Fan Filter Units, Terminal & Ducted Filter Units, Chemical Filters Portable Units.

AIR TREATMENT PRODUCTS

AIR HANDLING UNITS

We offer a comprehensive range of high-performance Air Handling Units (AHUs) designed to deliver efficient air circulation, filtration, and climate control. Our AHUs are engineered to meet diverse industrial, commercial, and residential needs, ensuring optimal indoor air quality and energy efficiency. With advanced technology and customizable solutions, we provide reliable and cost-effective AHUs suitable for various applications, backed by our commitment to quality and customer satisfaction.

COMMERCIAL KITCHEN HOODS

Livwell enhances commercial kitchens with cutting-edge exhaust ventilation hoods designed for sustainability and performance. From high-traffic HoReCa settings to modern culinary hubs, Livwell's ventilation solutions revive kitchen air quality and revitalize well-being—delivering on our promise of a healthier, greener tomorrow..

VENTILATION FANS

Supply and exhaust ventilation systems to commercial, residential industrial and kitchen applications.

Type of Fans:

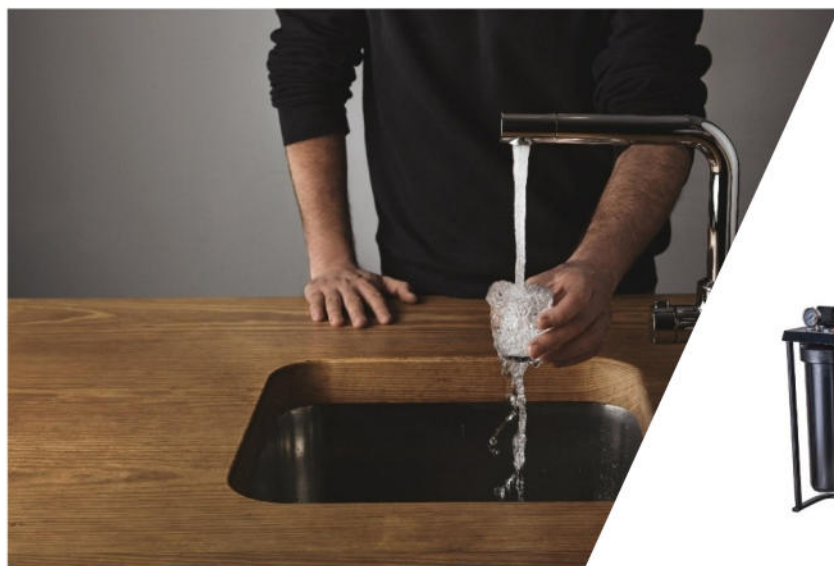

- Axial Fans
- Centrifugal Fans
- In-line Fans
- Roof Exhaust Fans

WHOLE HOUSE FILTRATION SYSTEMS

Whole House Water Filter Systems, also called as Big Blue or Jumbo Filter, are modular systems that allow you to custom order a water filter system for your water treatment requirements. This ensures removal of all contaminants pollutants and turbidity found in your water, so you have the best water quality.

WATER SOFTENERS

LIVWELL provide top-of-the-line water softeners from leading brands like Culligan and Clack. Our premium water softening systems are designed to effectively reduce water hardness, enhancing water quality and extending the lifespan of your plumbing and appliances. Experience the perfect blend of innovation, reliability, and performance with our trusted water softeners.

Culligan

REVERSE OSMOSIS SYSTEMS

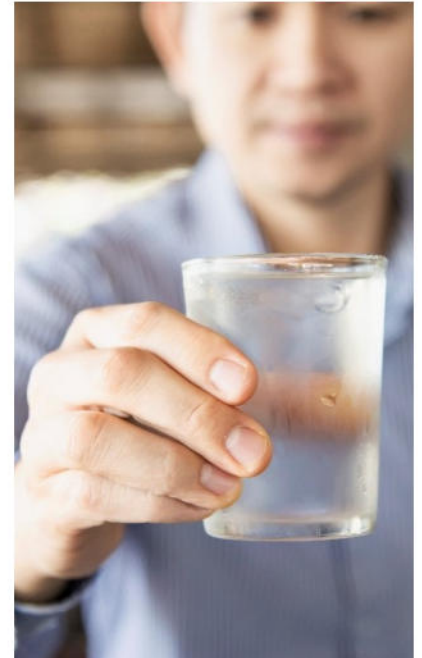

Our RO systems comes with built-in booster pump to add line pressure. Such system is compact and can be placed countertop or undercounter. And deliver pure, fresh, clean tasting water to assure your health and peace of mind. Optional alkaline or mineral water can be added advantage.

Available in various capacity. Offered for both residential & commercial applications.

Blueberg
WATER SOLUTIONS

waterlogic

wellsys

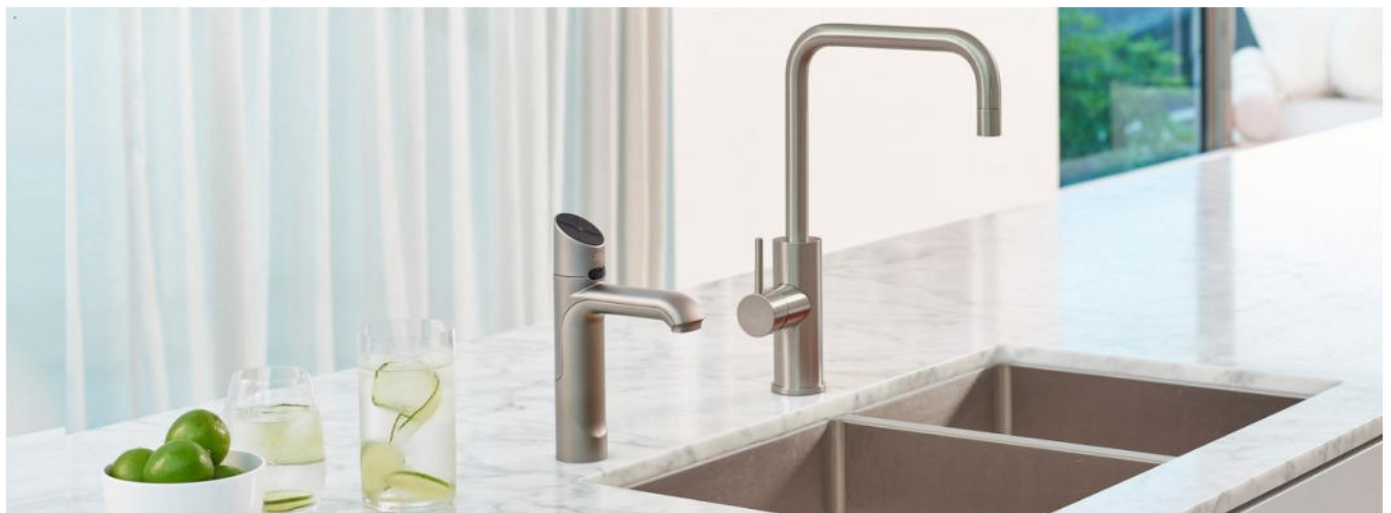

We offer premium water dispensers from renowned brands like **Oasis, Blueberg, Blupura** and **Zerica**. These top-tier products are designed to provide clean, great-tasting water with advanced filtration and energy-efficient features, ensuring both quality and sustainability for homes and offices.

DRINKING FAUCETS

We specialize in offering a diverse range of high-quality water faucets that blend innovative design with superior functionality. We offer premium water faucets from top brands like **Zip**, known for their innovative designs and exceptional quality. These faucets combine modern aesthetics with advanced functionality, providing durable and stylish solutions for any kitchen.

SHOWER FILTERS

We offer two innovative shower filter brands—PURE MIST and AROMIRA—designed to enhance personal wellness through advanced water purification.

PURE MIST focuses on effective removal of rust, chlorine, and other impurities using high-efficiency multi-stage filtration, ensuring cleaner and healthier water for daily use.

AROMIRA combines this purification technology with Vitamin C infusion and aromatherapy benefits, delivering a spa-like experience that nourishes the skin and relaxes the senses. Both brands reflect our commitment to quality, hygiene, and holistic well-being, making them ideal for modern homes and health-conscious users.

UV WATER TREATMENT

Our wide range of UV water treatment systems use ultraviolet light, adopting the technology of LED UV (no mercury), to kill bacteria and viruses in your water, providing additional protection for your family's health.

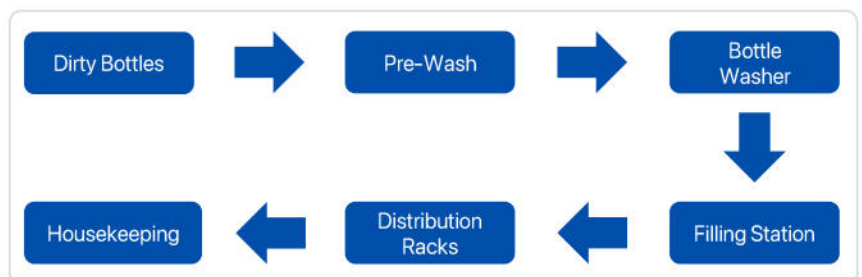

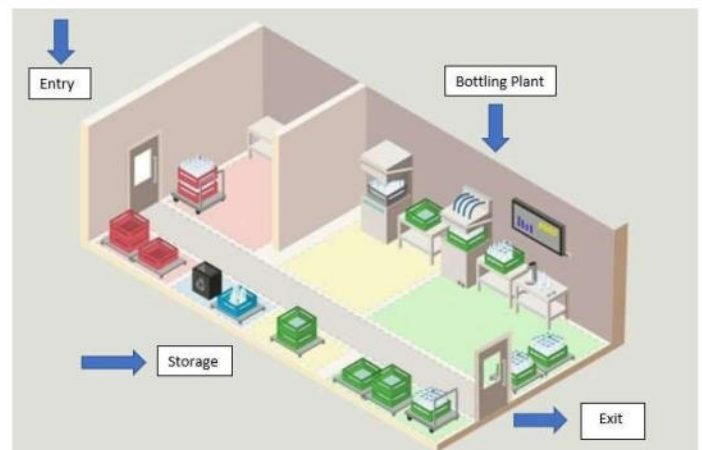

WATER TREATMENT PRODUCTS

SEMI-AUTO WATER BOTTLING STATION

Step into a new era of bottled water refilling stations where innovation aligns seamlessly with sustainability in water bottling solutions. We provide a sleek, compact product meticulously crafted to address diverse needs while embodying a unified commitment to efficiency and environmental stewardship.

We deliver a semi-automatic Water Bottle Filling Station, focused on small-scale operations, championing the recycling of glass bottles and cost-effective water refilling to minimize reliance on plastic.

Connect to any system such as backroom filtration, pre-filters, under-the-counter filters and softeners to ensure consistent water quality, preserve assets, and manage your fleet. Benefit from real-time monitoring, 24/7 anomaly alarms, replacement forecasting and automated reordering.

MONITORS & SENSORS

WATER QUALITY MONITOR

IoT BASED

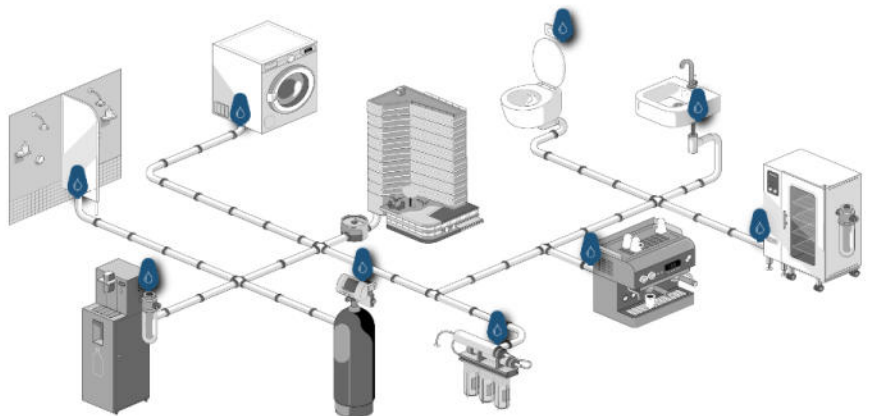

Extracting impactful insights is essential to learning how we have a positive impact on people, places and the planet.

We are digitizing the world's water-based assets to monitor them, protect them and raise consumer awareness to reduce water consumption. Directly connected to each of your equipment's water outlet, our sensor pre-processes data it receives from the sensor before sending it to the platform.

EXPERIENCE ANALYTICS AT THE LAST MILE GRID

Designed to fit easily from the building's main water entry, all the way to any point of use. All data is being interconnected in an IoT network to deliver fine-grained, time-relevant insights to facilitate your operations.

Connect to any system such as backroom filtration, pre-filters, under-the-counter filters and softeners to ensure consistent water quality, preserve assets, and manage your fleet. Benefit from real-time monitoring, 24/7 anomaly alarms, replacement forecasting and automated reordering.

ROOM PRESSURE DISPLAY (RTD)

Differential pressure monitors are used for measuring the difference in pressure between two different areas. commonly used in sensitive Cleanrooms, such as Compounding Pharmacies, Isolation Rooms, Operating Rooms, clean rooms, or production facilities. it indicates different pressure levels on the screen like normal mode, warning mode, and alert mode.

CO MONITORING SYSTEM FOR CAR PARKING

Carbon Monoxide monitoring system is specially designed for measuring the CO level in the car parking area. The system is integrated with multiple addressable sensors, alarms, and ventilation systems capable of continuously monitoring the CO level and to control the extract fans of the parking area. Preprogrammed panels suitable for small and large parking spaces with automatic and manual control as per project requirements. easy to install and configure also comes with a complete installation plan for quick set up and connections.

DATA LOGGERS

Data logger is a specially designed smart electronic device used to sense and measure the ambient parameters. it records the data at specified intervals and can generate reports automatically in various formats like PDF, CSV, or TXT formats. Data loggers come in multi variants like Single Use, Multi-Use, and Multi-channel loggers. Data loggers can be used in various fields like food, pharmaceutical, industrial environments, warehouse, and air quality monitoring.

REAL-TIME TEMPERATURE, HUMIDITY & IAQ MONITORING

Real-time temperature and humidity monitoring systems provide complete visibility of the important parameters in critical areas and updates the concerned persons immediately by Alarm, SMS, Call, and Emails. The system generates automatic reports as per user-specified intervals and sends them by email for record- keeping The main advantage of the system is to monitoring, protecting, complying, and updating. The devices are required to monitor medical refrigerators, temperature-controlled storage facilitates, clean rooms, blood banks, hospitals, pharmacy, food & nutrition, and clinical research centers.
