PURE LIVING. CLEAR FUTURE.

Innovating **WATER** for Life

LIVWELL
MIDDLE EAST

At **Livwell Middle East**, we believe access to pure, safe, and sustainable drinking water is a right—not a luxury. That's why we bring you advanced hydration solutions powered by our global partners, including Zip Water, Oasis, Blupura, Waterlogic, WellSys, and Droople.

Our state-of-the-art systems feature revolutionary Firewall™ UV purification technology—independently tested to eliminate 99.9999% of bacteria and viruses instantly, just before the water reaches your glass. This barrier also prevents any back contamination, ensuring every drop is as fresh and clean as nature intended. To enhance hygiene even further, BioCote® antimicrobial protection is integrated into high-contact surfaces, actively inhibiting the growth of microbes and offering lasting defense for users.

Partnering with **Livwell Middle East**, means more than just quality hydration—it means a step toward a sustainable future. Our solutions can reduce carbon emissions by up to 72% over five years compared to traditional bottled water use in offices consuming an average of 280 liters monthly. You'll save space, cut costs, and significantly reduce your plastic waste footprint.

Whether still or sparkling, your team will enjoy an unlimited supply of high-quality water, free from the environmental concerns and inconsistency of plastic bottles.

Experience water—refined, reimagined, and responsibly delivered..

Authorized Distributor of Well-known brands

Zip Water | **Blupura** | **Oasis** | **WellSys** | **Waterlogic**

GLOBAL BRANDS. LOCAL EXPERTISE.

At **Livwell Middle East**, we proudly represent some of the world's most trusted hydration brands—each engineered to deliver uncompromised quality, sustainability, and innovation in drinking water solutions. Together, they form a complete portfolio to serve every segment from hospitality and healthcare to corporate offices and residential needs.

Zip Water (Australia)

Precision. Performance.
Purity.

A pioneer in instant boiling, chilled, and sparkling water systems, Zip is renowned for its HydroTap technology—an all-in-one solution that combines elegance with functionality. Designed for modern offices and premium kitchens, Zip delivers unmatched performance with advanced filtration and energy efficiency.

Oasis (USA)

Hydration for Every
Environment.

With over a century of expertise, Oasis is a global leader in point-of-use and bottled water coolers. Its rugged, service-friendly dispensers are ideal for high-traffic commercial spaces, educational institutions, and healthcare facilities, offering consistent performance and ease of maintenance.

Blupura (Italy)

Premium Design Meets
Sustainability.

Blupura brings Italian design excellence to the world of drinking water. Their award-winning dispensers combine sleek aesthetics with eco-conscious engineering, offering premium still and sparkling water solutions with zero environmental compromise—perfect for executive lounges, luxury hotels, and upscale cafes.

WellSys (USA)

Hydration Evolved.
Wellness Delivered.

WellSys systems are designed with health-first hydration in mind. Featuring multi-stage filtration, alkalinity boost, and UV purification, WellSys brings advanced water technology to workplaces focused on employee wellness. From compact models to high-capacity systems, WellSys combines safety, taste, and performance..

Waterlogic (UK)

Pioneering Safety with
Firewall™

Waterlogic systems redefine purity through their patented Firewall™ UV purification, BioCote® antimicrobial protection, and multi-stage filtration. With a focus on health and hygiene, Waterlogic is the top choice for workplaces demanding the highest drinking water safety standards.

The Internet of Water.

Droople brings the power of IoT to water assets. Its smart sensors and AI-powered analytics platform monitor usage, quality, and performance in real time—optimizing maintenance, reducing waste, and enabling predictive servicing. From dispenser fleets to building-wide water systems,

ZIP HYDROTAP ARC PLUS

Pure Perfection on Tap.

Your trusted source for premium quality taps

Make life in the kitchen a whole lot easier with the **HydroTap Arc Plus**, offering you instant filtered boiling, chilled and sparkling water from one beautifully designed tap and under counter command centre.

Models	Water options			
				
HydroTap AP - B				
HydroTap AP - BC				
HydroTap AP - BCS				

FEATURES

- Ease and convenience - Offering instant filtered boiling water alongside unfiltered hot and cold water for washing up.
- The 5th Generation HydroTap has an antimicrobial additive in their key components - including the command centre - this reduces 99.9% of bacteria.
- 0.2-micron MicroPurity™ filtration technology filters out dirt, lead, cysts and microplastics, providing 25 times more effective filtration than a standard water filter jug.
- Unique user-safety options - Designed with safety in mind, the Zip HydroTap features cool touch tap and safety lock features to enhance the user experience.
- Power-Pulse™ technology - Minimizes power consumption by regulating power during heating and maintains stored boiling water to within 0.2°C of set temperature, meaning water is always dispensed at the desired temperature.

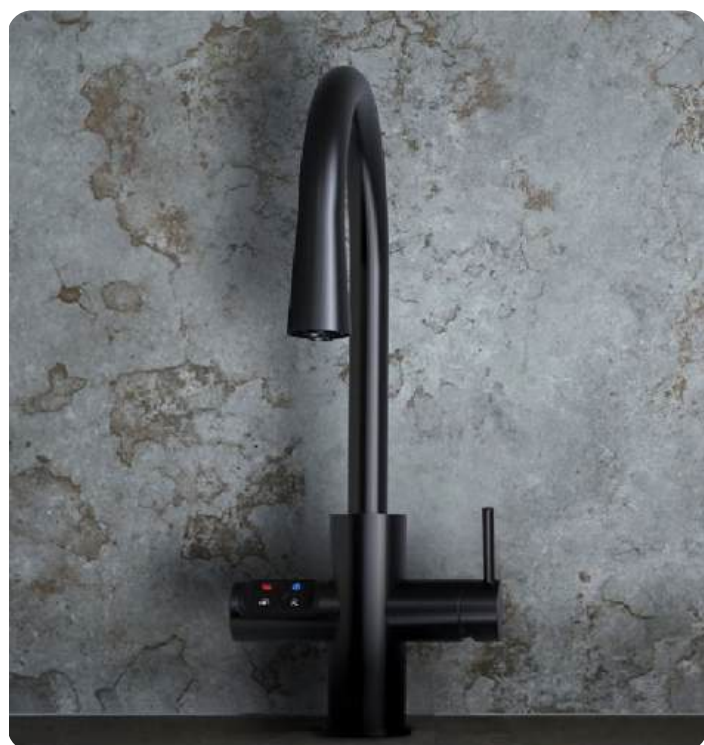

ZIP HYDROTAP

CELSIUS PLUS ALL-IN-ONE

Zip HydroTap Design Range CELSIUS PLUS All-In-One Boiling, Chilled & Sparkling Filtered water, plus Hot and Cold washing up water from a single tap (hot and cold-water supply required). The intuitive touch-pad with antimicrobial protection operates the filtered drinking water, while the lever dispenses unfiltered hot and cold water.

FEATURES

- 0.2-micron MicroPurity™ filtration technology filters out dirt, lead, cysts and microplastics.
- Brand new touchpad operation - the tap is operated via a simple press of a button.
- HydroTap employs water-conserving air-cooled chilling technology and energy saving sleep modes for maximum efficiency.
- Designed with safety in mind, the Zip HydroTap features cool touch tap and safety lock features to enhance the user experience.
- Power-Pulse™ technology - Minimises power consumption by regulating power during heating and maintains stored boiling water to within 0.2°C of set temperature, meaning water is always dispensed at the desired temperature.

FONTEMAGNA BRIDGE I.T. DISPENSERS

High performance in the smallest possible space.

Connected to the under-counter box, which can also be installed in another space, Fontemagna Bridge IT offers the same features as a large floor-standing cooler: portion control, anti-bacterial UV lamp at the outlet of each faucet, multiple dispensing.

Entirely made of aluminum and stainless steel, it has protected 3-way faucets which - on request - can be combined with bactericidal UVC lamps, located at the outlet on each single tap. The drip-tray is included.

FEATURES

- Volumetric portioning, as standard.
- Pure-tasting filtered chilled, sparkling or ambient drinking water to support optimum hydration levels and remove need for single-use plastic water bottles
- Under-counter command center for a sleek design.
- Suitable for front of house or areas with limited counter space to prevent clutter.

HYDRAZON DISPENSERS

Modern and elegant, it fits in with style in any type of environment.

Efficient in performance and simple in function, it can dispense up to 4 different types of water, with a dispensing area that allows the insertion of bottles and flasks. Hydrazon is the perfect solution for every office and workplace.

The best of both – eliminate heavy lifting of 19 liters water bottles with bottom load access or connect direct to a water line to dispense fresh filtered water. This unit can be easily converted from bottled cooler to POU operation.

This flexible water dispenser provides hot, ambient, and cold water on demand from either source.

FEATURES

- High Capacity
- Cold, Ambient and Hot
- Stainless Steel
- Indicator lights for hot & cold systems
- Cold tank capacity: 2.2 liters
- Hot tank capacity: 1.2 liters
- 2-year warranty

ECOCHIC I.T. DISPENSERS

The professional refrigerator with a unique design is “cool”!

Cold Still Water And Cold Sparkling Water, as well as Ambient Water Dispenser

Ecochic, is the most stunning “fountain spring” of still or sparkling chilled water, and also water at room temperature. It is a professional and powerful machine, which can be easily adapted to any type of environment.

A charming design that conceals a technological equipment of true top-of-the-line quality.

FEATURES

- Elegant yet functional design in a powerful dispenser suitable for any HORECA environment.
- Designed and made in Italy, built with high-quality stainless steel for better look and durability.
- Equipped with traditional mechanical taps for manual dispensing.
- Drip tray with grid to collect accidental spillage.

FIREWALL PROCESS

Firewall® UV-C technology: High-tech defence against germs

With standard UV systems, water is only briefly exposed to germicidal UV-C radiation. In contrast, the Firewall® system features pipes that spiral around the UV source, extending the distance the water travels within the light's path. This results in a significantly increased exposure time, enhancing the system's efficiency for nearly 100% purity.

The system also includes an indicator that alerts users if the UV lamp is malfunctioning. Depending on the model, water output may be stopped to ensure maximum protection.

purity level of
99,999999 %

Experience superior water quality:
Firewall® UVC purification system
provides on-demand purification,
eliminating up to 99.9999% of
pathogens.

Protecting
the Outside Too

BioCote is an antimicrobial technology.

A silver based additive incorporated into parts of many Waterlogic dispensers, restricts the growth of bacteria and mould around the dispensing area and filter. Reducing the potential for cross- contamination and keeps dispenser safer.

WL7

DROOPLE IOT MONITORING

Water Quality Monitor

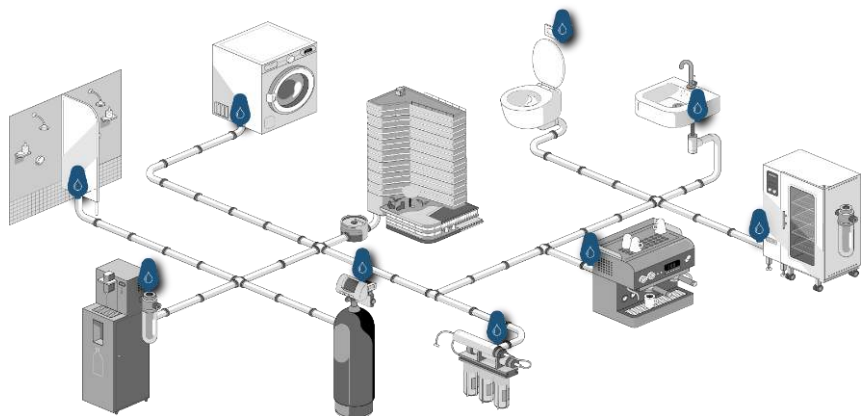

IoT BASED

Extracting impactful insights is essential to learning how we have a positive impact on people, places and the planet.

We are digitizing the world's water-based assets to monitor them, protect them and raise consumer awareness to reduce water consumption. Directly connected to each of your equipment's water outlet, our sensor pre-processes data it receives from the sensor before sending it to the platform.

Experience Analytics At The Last Mile Grid

Designed to fit easily from the building's main water entry, all the way to any point of use. All data is being interconnected in an IoT network to deliver fine-grained, time-relevant insights to facilitate your operations.

Connect to any system such as backroom filtration, pre-filters, under-the-counter filters and softeners to ensure consistent water quality, preserve assets, and manage your fleet. Benefit from real-time monitoring, 24/7 anomaly alarms, replacement forecasting and automated reordering.
